# About Us

**Shriji Polymers (India) Ltd.** instituted in 2005 has now become a true “**Packaging Power House**” for Pharmaceutical Manufacturers. The Manufacturing and exporting activities are spread worldwide, par excellence with international giants. We are supplying our products to sternly regulated countries including the USA, European Union, Canada and China.

- **Most preferential vendor status with Pharma MNC giants from a longer span of time**
- **US FDA (Type III) and Health Canada, Drug Master File Holder**
- **1st company to get CFDA (China FDA ) registered.**  
**CFDA no. -B20180001116**
- **Systems in accordance with cGMP norms**
- **Consistent expansion into neoteric products**

## Vision

To become a global molding solution provider facilitating a better health for mankind.

## Mission

Our endeavor is to evolve as an institution encompassing the core values –

- **Consistency and Compliance**
- **Sustainability**
- **Innovation**
- **Supported by skilled human resource using best in class technology.**

# Vision & Mission

# Our Presence

# Our Proud Moments

National Award for Outstanding Entrepreneurship in  
Manufacturing MSME, 2014

Presented by Hon. PM of India **Shri Narendra Modi**

# Our Products

## Containers

**“The core of our containers lies in our vast range”**

Shriji specializes in development, manufacturing, and distribution of primary packaging products for the Pharmaceutical and Nutraceutical industry.

### HDPE Bottles :

- Available in various shapes, sizes, and colors
- Special capacity for 2.5 to 7-liter jar
- Volume range: 10cc to 7000cc
- Available in different shapes and sizes
- Neck size range: 28mm to 110mm

### High Barrier Bottles :

**“Specialty packaging customized in accordance with keeping sensitive Pharma products stable”**

### Features:

- Light Barrier , Moisture Barrier and Oxygen Barrier
- Volume range: 40cc to 300cc
- Neck size range: 33mm to 53mm

# Our Products

## Closures

### **“Product safety is our first and foremost priority”**

State of the art cap lining and multi-head wadding machines with European technology give us the flexibility to cater to different needs with ease in customization. Fully integrated product manufacturing from molding, assembly, and camera-based vision inspection.

### **CRC (Child Resistant Closures):**

- Compliant with CPSC norms for child safety and senior friendly
- Push and turn functionality
- Neck size range: 20mm to 89mm

### **CTC (Continuous Thread Closures):**

- User-friendly
- Neck size range: 20mm to 110mm

# Our Products

**“Only your imagination limits the possibilities”**

Shriji's team is currently involved in developing ophthalmic bottles and built-in desiccant closure systems.

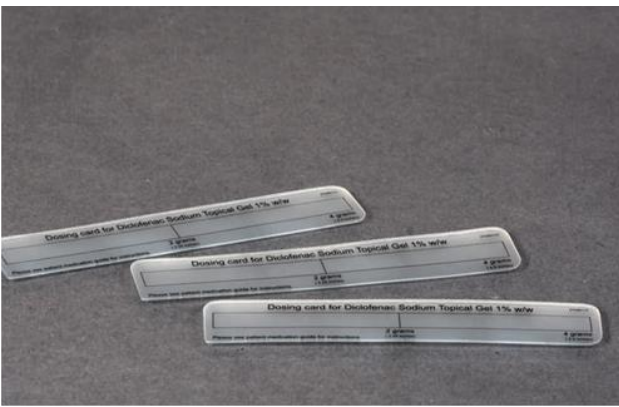

## **Spoon, Scoops, Measuring Cups:**

Spoons, Scoops, and Measuring cups are basically used for measuring a quantitative amount of dosage form (liquid, granules, etc.) for oral application. Spoons are CE marked.

## **Tablet Applicators:**

Vaginal tablet applicator is the assembled form of barrel and plunger, used for administration of single tablet intravaginally.

## **Dosing Cards:**

Dosing card is used to administer a fixed dose of topical formulation. It is also termed as dosing scale.

## **Derma Bottles:**

DD Bottles large, quality pack that easily dispenses the topical application products, is durable and convenient to use.

# Quality Control

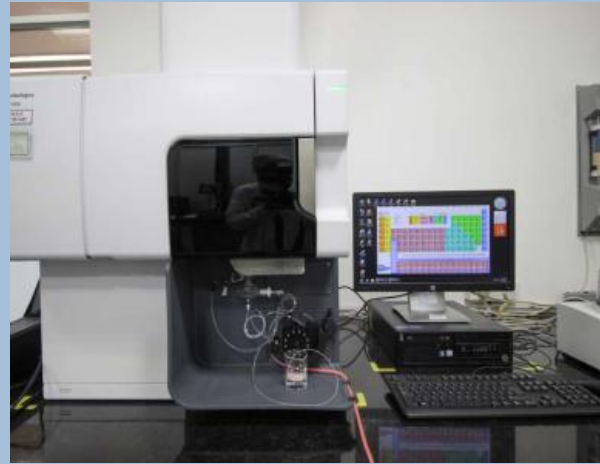

**“Strong footstep towards zero defect”**

## **Vision Inspection System**

An incomparable vision testing system with cutting-edge technology from an American manufacturer of bottles and European giant for closures has been implemented to detect and remove all probable defects. Our machines have capacity of manufacturing 1500 closures and 300 bottles per minute enabling us to match our speed of inspection.

## **On-site Laboratory**

We have in-house facilities to carry out tests as per USP 41 for US DMF Type III for primary packaging products.

- Manufacturing in a clean room (HEPA filtration)
- ISO class 8 complaint
- Active format US DMF portfolio
- (eCTD format) Canadian DMF portfolio
- STP and SOP adherence as per cGMP norms
- Periodical staff training for keeping in updation with cGMP
- ISO 13485 Medical devices – Quality Management Systems – Requirements for regulatory purposes is an International Organization for Standardization (ISO) standard published for the first time in 1996. It represents the requirements for a comprehensive quality management system for the design and manufacture of MD.
